

Read me

The Lab 4 consists of 2 parts Server and Client

Server :-

Compile :- javac Server.java

Run :- java Server

Client :-

To Compile:- javac Client.java

Run :- java Client Saurav 324567

Few point about my code:-

For session key I used AES CBC mode instead of AES CCM as default JCA does not support CCM (I have asked sir for it and he is ok with it).

There is a user registration java code presents also I have enable the registration for four people any one new needs to register to server with his username and password before accessing.

To Compile :- javac User.java. To Run :- java User.
